

## ASSEMBLY INSTRUCTIONS

Qwik/Divide™ Self-Standing Popcorn Dividers are easy to assemble. **The most important thing is to make the first fold in the correct direction.** Otherwise, all the locks will seem off about 1/4".

Follow these easy instructions step-by-step, and it will be like second nature. It's kind of like following instructions to tie a shoe. So simple, but hard to put into words. Call us at 1.800.749.9911 with any questions.

### STEP 1:

With the size marking furthest away from you (we've darkened it here), fold it over so the marked side goes down.

### STEP 2:

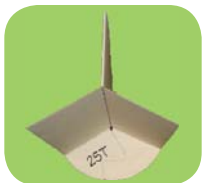

Flip the side lock (the little notch) up to lock the two sides in place.

### STEP 3:

Secure the bottom lock by slipping the two pieces together in opposite directions.

### STEP 4:

Drop it in a can and your done and ready to get filling and selling!

**Holiday Tins™  
& Containers**
